Integrated Solution for Samsara GPS & Telematics

Ward - Go Fuel - Interface®

Fuel authorization interface for Ward Fuel Management customers

The Ward - Go Fuel - Interface (WGFI)* was engineered as an economical solution for odometer validation and OBDII data sharing between Samsara and Ward's Fuel Management solution. Samsara devices interface with the WGFI to communicate with a Fuel Control Terminal (FCT) and automate your fueling access. The FCT captures and transmits the fuel transaction data, VIN, odometer and/or engine hours to Ward's Fuel View software.

If the vehicle has a Samsara account set up, the device also transmits the telematics to Samsara in real-time, with all the Samsara data collection specifications.
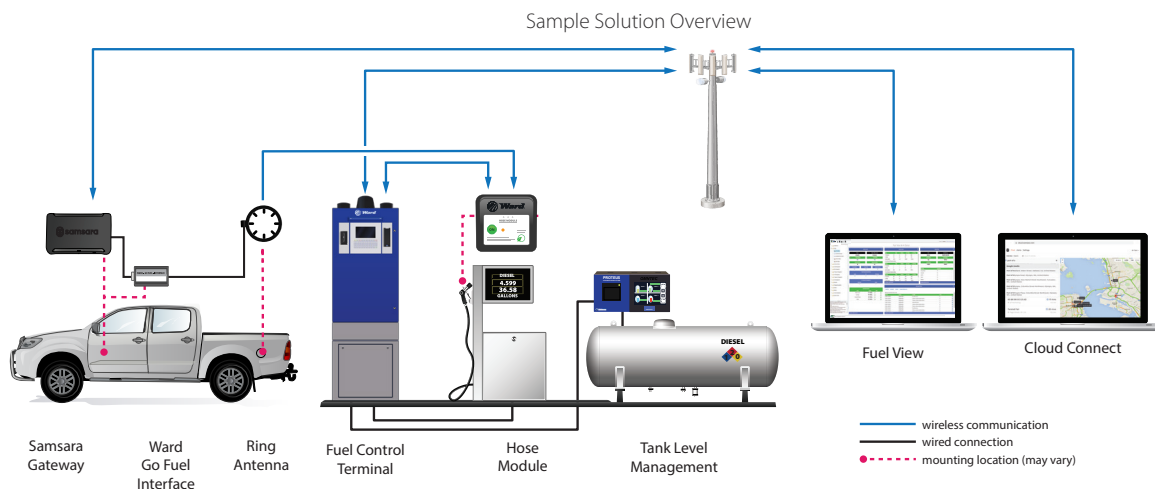

KEY BENEFITS

- 100% compatible interface Samsara devices and Ward Fuel Management Solution

- Easy installation

- Authorize access to any fuel and EV charger:

Contact a SimplyFuel Solutions consultant for the options that best fit your fleet's needs.

Specifications	
Voltage Range	6-33VDC
Electrostatic Resistance	Non-conductive enclosure
Operational Temperature	-40°C to 85°C
Humidity	+85% RH per SAE specification
Dimensions	2.5" x 1" x .5" (W x D x H)

Sample Solution Overview

| Samsara Gateway | Ward Go Fuel Interface | Ring Antenna | Fuel Control Terminal | Hose Module | Tank Level Management | Fuel View | Cloud Connect |

——— wireless communication
——— wired connection
- - - - mounting location (may vary)
