ROADFLEX

Fleets Deserve Better

RoadFlex is a leader in fuel risk management. Thousands of commercial fleets nationwide currently leverage its next-generation analytics insights, operations automation, and fleet reporting.

This includes businesses that manage fleets, such as HVAC companies, utilities, construction, landscaping companies and government agencies.

INTRODUCING

SimplyFuel™

VISA Fuel Card for Fleets

Manage all fleet spending from a single platform with real-time transaction data

Provides secure access to on premiss fleet fuel, public fuel stations, and EV chargers, and allows fleet managers to customize rules and controls for each card and driver

Fleet fuel site dispenser access

Fleet access and public EV charger purchase

Public gas station purchase

Integrated platform

The secure SimplyFuel Solutions Visa card allows access to fleet consolidates fuel sites and public station fueling.

Accepted nationwide

Use the SimplyFuel card anywhere Visa is accepted. Never worry about out-of-network fuel stations or fees.

Control every dollar spent

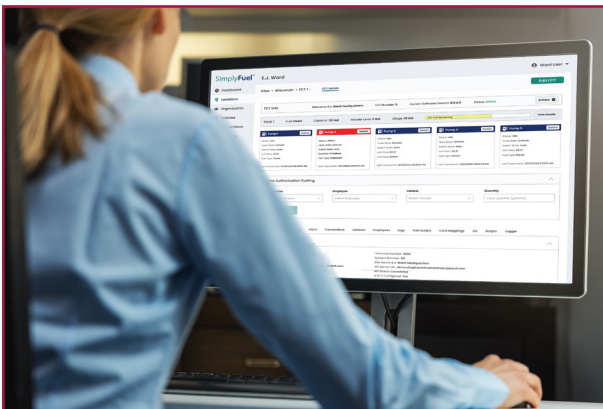

Set rules and spending limits for each card or driver, issue cards instantly and authorize payments in real-time.

Eliminate card misuse and fraud

Leverage SimplyFuel SMS Security with telematics to validate legitimate spending and receive real-time alerts to block fraud in its tracks.

Pay for other fleet & business expenses

Unlock your SimplyFuel Visa card to buy more than just fuel while on the road. Enable fuel-only purchases or allow your drivers to spend on fleet expenses such as maintenance, tires or parking. Customize access for purchases to include maintenance, repairs, tires, hardware stores, food, and more.

Seamless telematics integration

Seamlessly combine purchases with telematics data to leverage advanced reporting, analytics and fraud prevention. Get a 360° view of your fuel efficiency data for each of your drivers and vehicles.

SimplyFuel card's telematics integration allows Managers to verify the cardholder, vehicle and transaction location at the time of each purchase to validate legitimate purchases in real-time.

Optional automated odometer and fuel gauge capture, you'll know exactly where and when your drivers are making purchases.
